Press release : Antrimon Group AG becomes part of the SwissFactory.Group

Antrimon Group AG announces that it will become a member of the SwissFactory.Group as of 1 July 2023.

Antrimon develops innovative mechatronic systems close to the drive. The focus is on sustainability and quality, from the idea to product support. By combining the versatile synergies from the three business areas Drive Technologies, Engineering and Contract Manufacturing and the resulting know-how, significant added value is created for customers.

The SwissFactory.Group, headquartered in Neuenegg near Bern, was founded in November 2020. It is a group of companies that aims to make a significant contribution to the reindustrialisation of Switzerland as a manufacturing location with its vision "We are the Swiss factory" and the merger of innovative SMEs with complementary manufacturing and assembly technologies as well as complementary engineering know-how. The addition of Antrimon expands the group to 12 companies with around 450 employees.

As part of the SwissFactory.Group, Antrimon is ideally placed to meet customer expectations and needs even better and to develop further. With this step, founder and owner Stefan Schimon is securing a future in an innovative, digitalised and diversified industrial group. "Realising ideas together and successfully implementing innovations: That is the credo of SwissFactory.Group AG and Antrimon Group AG. With our new partnership at eye level, we want to strengthen Switzerland as a workplace and break new ground. Because we share the same values and have the goal of offering everything from a single source, from the initial concept to the finished product," says Stefan Schimon, Chairman of the Board of Directors of Antrimon Group AG.

Stefan Schimon will remain Chairman of the Board of Directors of Antrimon Group AG in the future and will also take on a board mandate at SwissFactory.Group. Consequently, he will contribute his knowledge and experience to the SwissFactory.Group in the future.
