

# LINEAR ROTARY ACTUATORS | LBR/LCR SERIES

The LBR and LCR are slim, stackable Z-theta actuators.

- ✓ Independent linear and rotary motions in one unit
- ✓ Absolute control over force/torque, position, acceleration and velocity
- ✓ Direct drive brushless servo motor
- ✓ Vacuum through shaft prevents dust accumulation

NOTE: For any SMAC Moving Coil Actuators, the maximum recommended continuous duty current is 600mA supplied to the actuator over a 1 second period. For anything beyond this in terms of current draw or time please consult the factory. We manufacture actuators to suit our customers' requirements. Please call us if you do not find the right actuator in this list.

LBR62

LCR13

LCR16

LCR20

## Options & Modifications (Consult factory for availability)

- Linear encoder resolutions ----- 5µm standard, 1µm optional.
- Shaft ends ----- Male, Female, Blank and Custom (check availability of custom option).
- Return spring ----- Prevents the shaft from dropping during vertical operation when power is cut.
- Vacuum ----- For pick and place applications.
- Extended nose bushing ----- For tighter shaft run-out and higher side load onto the shaft.
- Increase of force & acceleration ----- 48 volt coil and double coil options are available for some units with 24 volt single coil.
- Increase of torque/gear ratio ----- Alternative geared motors are available for some units.
- Rotary encoder resolution ----- Consult factory for higher resolution.
- Increase of force accuracy/lifetime ----- Low-friction linear guide/extralong preload linear guide.
- M12 connector ----- Option available with CBR series
